Introduction

Create a .html document with the standard HTML-structure (<html>, <head>, <body> etc.). Set up a basic structure following HTML5 semantics that includes a header-element to contain a menu with links to relevant pages and a picture of you. Further, the page should include a section that present projects that you have been part of in a list, and/or similar sections with work experience, and courses and educational institutions attended. One section presenting one of the examples above is sufficient.

Lab Objective

To be familiar with HTML Tags and design a complete HTML5 document for a web resource.

Question 1

Create a static webpage using table tags of HTML.

Question 2

Create a static web page which defines all text formatting tags of HTML in tabular format.

Info: Use all the attributes of font tag.

Question 3

Create a webpage using list tags of HTML.

Question 4

Create employee registration webpage using HTML form objects.

Question 5

Create HTML page that envisions all the concepts related to links: anchor, link, alink, vlink.
